Without Prejudice

“The most important thing for me is that I have acquired working habits and had the chance to experience a working atmosphere in a company. I think that’s the greatest value of the practice I’ve had”

Lazar Bulatović

TRAINING GOALS: Establishing dialogues, relationships of trust and creating working conditions that are appropriate for both young people with disabilities and their employers.

STORY

Lazar Bulatović, a sociologist, worked as a practitioner in the field of developing an e-learning platform for transcription of video material, as well as translating declarations from English and German. The practice enabled Lazar to acquire new skills, work habits, meet new people and enrich his curriculum vitae.

PARTNER STATEMENT: “Organising practical work enables each company to create a quality base of future personnel that can be used later. Also, this is a kind of trial work, so employers can recognise in the practitioners those who would fit in well with the team. Research shows that the productivity of a company grows when young people are hired because young people bring in ideas and new creative energy”, Ljiljana Pavlović, Employers’ Union of Serbia

5 employment agreements were signed, 3 young persons participated in public works organised by NES

Praksa je Lazaru omogućila da stekne nove veštine, radne navike, upozna nove ljude i obogati svoju radnu biografiju.

REČ PARTNERA: „Organizovanje prakse svakom preduzeću omogućava da napravi kvalitetnu bazu budućih kadrova koja kasnije može da se koristi. Takođe, ovo je i svojevrsan probni rad,

pa poslodavci mogu u praktikantima da prepoznaju nekoga ko bi bio dobar deo tima. Istraživanja pokazuju da produktivnost kompanije raste kada se angažuju mladi ljudi, jer mladost donosi ideje, novu kreativnu energiju“, Ljiljana Pavlović, Unija poslodavaca Srbije.

"Mislim da je najveći uspeh – promena percepcije mladih ljudi iz ove sredine da ovde može da se radi i živi od svog rada", Suzana Dimitrijević iz organizacije EPuS

OBUKA: deset tročasovnih radionica i tri meseca rada sa mentorima za potencijalne preduzetnike, odnosno mesec i po dana prakse za mlade koji žele da se zaposle

“Godinama sam pokušavao da dođem do posla koji volim, a to je posao frizera. Svima kažem mora da se pokuša. Mene to sad ispunjava, radujem se kao dete.”

Ivan Milenković (23)

“It was important for us to face the situation head on, that is, to face the company”

Katarina Jović

Now We Know What They Did Last Summer

TRAINING OBJECTIVE: Increasing student employability through connecting with the economy and acquiring locally applicable practical knowledge.

STORY: Katarina Jović, a student at the Faculty of Occupational Safety, believes that theory is taught at the faculties, but that the only reason she acquired the internship necessary for future work was by participating in the Practical Academy. For Katarina, teamwork is very valuable, which is especially important for a person in charge of occupational safety, health, fire protection and environmental protection.

PARTNER STATEMENT: “Companies are interested in the programme, students are satisfied and once they are 80% ready,

they join the company. Through this practice, they gain guidance and the methodology required of them as master protection engineers.” Sveta Cvetanović, professor at the Faculty of Occupational Safety

“Our goal is to show that it can have an impact. There are so many companies that need help, and there are students who are interested in internships”, Dejan Mitić, Association for Local Development of Kamenica

TRAINING: a four-week internship

54 students participated in the programme

The market value of products and services developed by students during practice twice exceeded the total value of the project (EUR 23,000).

Sad znamo šta su radili prošlog leta

CILJ OBUKE: Povećanje zapošljivosti studenata kroz povezivanje sa privredom i sticanje lokalno primenjivih praktičnih znanja.

PRIČA: Katarina Jović, studentkinja Fakulteta zaštite na radu, smatra da se na fakultetima nauči teorija, ali da je tek učešćem u Praktičnoj akademiji stekla praksu neophodnu za budući rad. Za Katarinu je rad u timu veoma dragocen, što je posebno važno za osobu koja je u firmi zadužena za

bezbednost i zdravlje na radu, zaštitu od požara i zaštitu životne sredine.

REČ PARTNERA: „Firme su zainteresovane za program, studenti su zadovoljni i nakon programa su 80 odsto spremni za ulazak u firmu. Kroz ovu praksu dobijaju smernice i metodologiju šta oni zapravo treba da rade kao master inženjeri zaštite“, Sveta Cvetanović, profesor Fakulteta zaštite na radu „Naš cilj je da pokažemo da može, da ima efekta. Toliko je firmi kojima je potrebna pomoć, kao i studenata koji su zainteresovani za praksu“, Dejan Mitić, Udruženje za lokalni razvoj Kamenica

OBUKA: četvoronedeljna praksa

54 studenata je učestvovalo u programu

Tržišna vrednost proizvoda i usluga koji su razvili studenti tokom prakse prešla je za duplo ukupnu vrednost projekta (EUR 23,000)

„Bilo nam je važno da se sretnemo sa realnom situacijom, odnosno kompanijom“
